

Cloud Computing

Finished with all big IT-investments in the office, the only thing that's left is a fixed foreseen monthly cost.

Simplifying IT

With the centralised solution from Synctel this becomes all history. By bringing all software your employees use on their own pc together on one place on one or more virtual servers in our data-center, you can see your costs going down very fast! Finished with installing software on every pc, finished with doing updates and backups. Even your UPS and server-airco's disappear. Even your energy invoice will be much lower, since you got rid of all the boxes in your office.

- Your daily work environment available from all over the world.
- Fixed monthly fee per person, all-in
- Low maintenance and always up-to-date and with the last software suites
- All completely tailored for your needs

Working at the office, from all over the world...

Your complete work environment 'in the cloud'

"NOT FOR NOTHING MORE AND MORE COMPANIES ARE TAKING THE STEP"

DATACENTER

- PHYSICAL SECURITY
- UPS AND DIESEL POWER
- AIRCONDITIONED
- RIGHT ON THE MAYOR EU AND INTERNATIONAL INTERNET LINES
- WATERPUMPS

We install one or more virtual servers with all software your company uses. Your employees can start working in your cloud with 1 mouseclick and after entering their password

You can define which programs are available to who

Also printing to the printers in your office or at home is built-in, all local printers are available 'in the cloud'

Flexible solutions for all your company needs

I still want to keep my servers in house

If you don't want to take the step yet and want to have your servers in your office, we can install, configure and maintain them for you. Complete with E-mail, BlackBerry or Mobile Mail and Database management. After the configuration of your dedicated firewall you are strongly secured against threats

VOIP with ShoreTel

Make calls with your clients or suppliers over the internet, they don't notice the difference, only you will when your get the much lower invoice.

You can buy your own VOIP PBX or you can rent it for low monthly amounts.

Synctel Europe

We have offices in the UK, Sweden, Switzerland, The Netherlands. With the fast internet connections these days all countries seem to be next door....

Network support

We are your out-house IT-department. Full sever and pc maintenance, from remote or in your office.

Datacenter Colocation

Do you want to maintain your own virtual server on our cloud? No problem. We set it up, you do the rest. Firewall included

Would you like to see a demo or get a free offer? Contact us at info@synctel.be

You can start your demo only moments after the request, we can setup your cloud in a few hours!
